### SLOGANS ON WATER Conservation

- ❖ Walk in the desert, you will realize the coast of water !!
- ❖ How many drops make up an ocean?    
 Conserve water, every drop counts !!
- ❖  Even a single drop in the ocean matters   
 Be the drop, start saving water !!
- ❖ If we don't learn to conserve water   
 We will all be fish out of water !!
- ❖ Please enrich the rain water tank   
  to save it from seepage !!
- ❖ Every drop of water wasted is,   
 Himself wasting one second of his life !!
- ❖ Life is dependent on water, And   
 Saving water is dependent on you !! 
- ❖ Saving water can save the world   
 Rain water tank, won't break the bank   
 Think out side the sink!   
 Save water... It's not just a drop in the bucket   
 Don't be a fool, Love your Pool !!

# A LETTER TO THE COVID WARRIORS

DATE	PAGE NO.	Letter Writing	EXPT. NO.
------	----------	----------------	-----------

Dear Covid warriors,

I hope this note finds you well!

This pandemic has been trying for us all best for some more than the others. I cannot thank you all (Doctor, Nurse, Hospital staff) enough for taking such good care of me.

I applaud your commitment towards your noble work and admire the care and affection you have shown me.

I wish you and your family good health and pray for your well being.

Thank you!  
with lots of love and respect.

## Letter writing

Dear Covid warriors,

In this pandemic situation every person is doing their work at online except Covid warriors. The helpers, nurse, doctors and many others who were working at offline, were the Covid warriors who were fighting with Coronavirus only for our safety.

Many of them died in corona. And in present days also many were Covid positive.

The sweepers, cleaners of washrooms. The nurse and doctors were P.P.A in every day and mask, cap, glass etc. <sup>It is too</sup> ~~It is~~ very difficult to breathe and many other problems they faced.

So, it is their right to get good wishes and a lot of thank you from local <sup>warriors</sup> ~~people~~, as only because of their sacrifices the spread of COVID-19 is <sup>now</sup> ~~not~~ controlled.

Thank you for your sacrifices and have a lot of good wishes from your well wishes.

# COVID-19 RESPONSIVE SCHOOLS (VIRTUAL)

## Letter On COVID-19 Responsive School (Virtual)

Dear all we know that last few years were tough, but we're excited to get back in the classroom this fall. We are committed to taking the steps necessary to help us have a safe return to school. Regular testing will help protect you, students, staff, family members and others who are not vaccinated against COVID-19 or are otherwise at risk for getting seriously sick from COVID-19. Read the 19 March 2021 statement of the WHO global advisory committee on vaccine safety COVID-19 subcommittee on safety signals related to the AstraZeneca COVID-19 vaccine. The world is in the midst of a COVID-19 pandemic. As WHO and partners work together on the response, tracking the pandemic, advising on critical interventions, distributing vital medical supplies to those in need, they are racing to develop and deploy safe and effective vaccines. Vaccines save millions of lives each other year. Vaccines work by training and preparing the body's natural defences. Now it's our prime duty to follow all the initiatives taken by the government like maintain social distancing, wearing mask, washing our hands and a lot more. Now we have a lot of time to improve our hobbies, helping our parents and learning new things. Understanding the pros and cons of each and every thing will increase our knowledge and so learn. So open up your curious mind and keep exploring. At least it's a small request from my side. Always remember! that products from China are never long-lasting. So, in COVID-19.

- Be informed
- Be prepared
- Be smart
- Be safe
- Be ready to fight COVID-19

To,  
The Principal  
Kendriya Vidyalaya  
No.1 Salt Lake  
Date :- 6/09/21

Subject :- Covid-19 responsive school (virtual)

Dear Sir,

I am Parba Behra from class VIII 'C'. I am a student of your school. The schools were closed because of covid-19. Today we are doing online classes. In future we will continue these classes. In online classes we can learn more things in less time. But for the poor student who did not have any phones. They can not attend online classes. But if we post daily's work in T.V. then they can attend the classes on T.V. By the online classes students were seeing more mobiles and their eyes were getting affected. Online classes were a challenge towards teachers, students and parents also.

I hope from the next year our school will continue like normal. We miss our school. Thank you.

Yours obediently  
Parba Behra

## Effect of covid -19 on school :-

No one would have guessed that a virus-like Covid-19 would come and without differentiating, it will alter the lifestyle of people. Due to Covid-19, many changes came to our world and It took some time for everyone to adopt the new normal. The Covid-19 impact was everywhere, which resulted in the closure of Schools and other educational institutions.

Initially, most governments have decided to temporarily close the schools to reduce the impact of Covid-19. Later it was reopened for a few grades, which increased the number of infection rates and then closed again.

Though schools are closed, students are attending their classes through various education initiatives like online classrooms, radio programs. Though it is a good thing happening on the other side, there are lots of students who don't have the resources to attend the online classes, suffer a lot. Many students are struggling to obtain the gadgets required for online classes.

Teachers who are all experts in Blackboard, Chalk, books, and classroom teaching are really new to this digital teaching, but they are adopting the new methods and handling it like a pro to aid the students in the current position.

But on the negative side, many teachers are looking for an alternative job to support their families.

Educated parents are supporting their children throughout the pandemic, but we need to understand that there are some illiterate parents and their feeling of helplessness to help their children in their education.

There are students in India who come to school just because they can get food. The great midday meal scheme has helped many children who couldn't bring their food from the home to get their nutrition.

Because of the closure of the schools, many students were suffering from not having enough food for their survival.

There is always a delay or cancellation of exams, which leads to confusion for many students and there is no room for curriculum.

Most of the school-going children are involved in child labour to support their families.

## THEME COVID AND CONSEQUENCES

### Essay on 'COVID-19 response School'

One of the most often used terms after the pandemic is 'new normal'. The new normal in education is the increased use of online learning tools. The pandemic has triggered new ways of learning. Today digital learning has emerged as a necessary resource for students and schools all over the world. For many educational institutes this is an entirely new way of education that they have had to adopt. Online learning is now applicable not just to learn academics but it also extends to learning extra curricular activities. Schools throughout the world have been able to keep the

Online learning offers teachers an efficient way to deliver lessons to students by a number of tools such as videos, PDFs, other online resources. It allows students to attend class from any location of their choice. Online lectures can be recorded, archived and shared which helps the students to learn at their own pace. A lot of time and energy is saved in online learning process. The online learning system with its range of options and resources can be personalized in many ways. In order to make sure that motivation and guidance which we used to get during offline classes are not missed out our teachers make sure to start the class by motivating quotes. 'Prevention is better than cure' hence it is necessary to have proper information about the virus and to implement those in day to day life. School and teachers play a vital role in

### Effect of covid -19 on school :-

No one would have guessed that a virus-like Covid-19 would come and without differentiating, it will alter the lifestyle of people. Due to Covid-19, many changes came to our world and it took some time for everyone to adopt the new normal. The Covid-19 impact was everywhere, which resulted in the closure of schools and other educational institutions.

Initially, most governments have decided to temporarily close the schools to reduce the impact of Covid-19. Later it was reopened for a few grades, which increased the number of infection rates and then closed again.

Though schools are closed, students are attending their classes through various education initiatives like online classrooms, radio programs. Though it is a good thing happening on the other side, there are lots of students who don't have the resources to attend the online classes, suffer a lot. Many students are struggling to obtain the gadgets required for online classes.

Teachers who are all experts in Blackboard, Chalk, books, and classroom teaching are really new to this digital teaching, but they are adopting the new methods and handling it like a pro to aid the students in the current position.

But on the negative side, many teachers are looking for an alternative job to support their families.

Educated parents are supporting their children throughout the pandemic, but we need to understand that there are some illiterate parents and their feeling of helplessness to help their children in their education.

There are students in India who come to school just because they can get food. The great midday meal scheme has helped many children who couldn't bring their food from the home to get their nutrition.

Because of the closure of the schools, many students were suffering from not having enough food for their survival.

There is always a delay or cancellation of exams, which leads to confusion for many students and there is no room for curriculum.

Most of the school-going children are involved in child labour to support their families.

doing so.

This pandemic has not only affected the students but also the Low-budget institutions and schools, resulting in close-down the same. There are both positive and negative matters happening around us amid the Covid-19.

Technology paves the way for education, thus helping the students and teachers to connect virtually through online classrooms, webinars, digital exams, and so on. But the sad truth is that it is not available to many students all over the nation. Everything is happening for the well-being of the students so that they can stay safe at home without getting affected by the life-threatening virus.

We are not ready for this, but it came, so we have to go through this together, but we have to update the infrastructure and should think of ways to undertake the situation and providing education to every child amid the pandemic if we face something precisely like this in the future to aid the forthcoming generation. Stay home. Stay safe.

## THEME: COVID 19 RESPONSIVE SCHOOL

### Learning through a Pandemic

-Riddhi Guha XI B

We learned of it  
On that fateful December.  
We needed to do the right thing,  
And not just what we saw fit.

A new threat on the rise.  
A new challenge to face.  
A new obstacle,  
Just to surmise.

Quickly, the disease took hold,  
And humanity responded.  
But there was mass panic,  
Truth be told.

Now then, what of the students' lives?  
They were not put on hold.  
No, the schools and students alike,  
Pushed through with intent to survive.

We took to screens,  
We were determined to learn.  
Our efforts were evident.  
Oh, let me tell you what I mean.

We were introduced to new features;  
New ways to work,  
New ways to study,  
New ways to connect to teachers.

Can learning be done at such distance?  
With aid of technology,  
The schools organised projects, activities;  
Strong, was our persistence.

Schools, responsive to the new threat,  
Made sure to maintain protocols.  
The new situation was hard,  
We continued, at any rate.

### Covid-19 responsive school Poem

Corona made a splash in the whole world.  
Introduced everyone in their respective homes.  
The children also became helpless.  
Their online class from tomorrow.  
So break the bond, stop following the rule.  
The thing about online class is unique.  
It just kept going on for years.
